

CI6222 Mobile & Ubiquitous Applications

# Electronic Shopping

University Students' Priorities for Smartphone Applications  
on Online Purchasing

G1701603H Caslyn Tan Jia Yun

G1701513D Nah Zheng Xiang, Philson

G1701182G Xue Fei

## Presentation Outline

### Summary of the Paper

Objectives, Research Methods, and Findings

### Our Further Analysis

Limitations of Study, Other Areas to Explore

### Future Market Trends

Current Popular Apps, Future Developments

# The Paper: Objectives

1

Examine university students' usage of online shopping apps

2

Identify the triggers behind the installation of these apps

3

Examine priorities for desirable attributes of shopping apps

# The Paper: Research Methods

247 students from  
Ehime University & Matsuyama University,  
Japan

Female  
44%

Male  
54%

## Grade

# The Paper: Research Methods

## Phase One: Questionnaires

Basic info on smartphone app usage and online shopping behavior

## Phase Two: Choice-Based Conjoint Analysis

Examined 5 attributes that influenced online purchasing in apps

- Assortment
- Popularity
- Availability of rare goods
- Caring about security & personal info
- Bonus point ratio

# The Paper: Findings

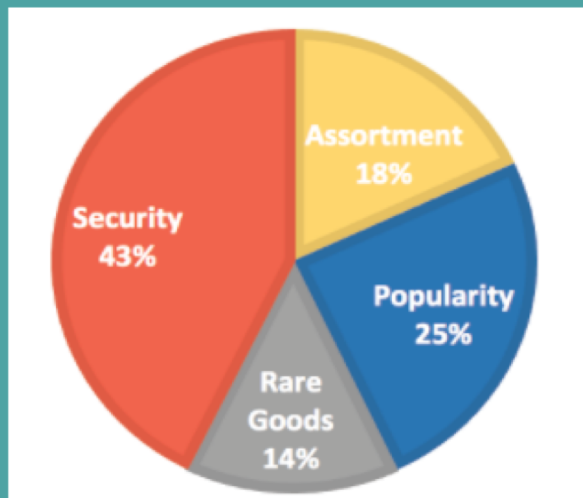

## Key Findings

- Most university students have at least 1 shopping app installed.
- Friends' word of mouth and the media greatly affect installations.
- Monetary incentives have relatively little impact on installations

# The Paper: Findings

## Means of Searching for Good Online

## Key Findings

- At time of study, most students still prefer searching through browser.
- Assortment and Rare Goods had relatively little impact.
- Security and popularity of the app were ranked as the top priorities.

# Our Further Analysis: Limitations of Study

## User Experience

- Prior experience in using mobile shopping applications is critical in studying the behavioural intention of users [1]

*Share of Time Spent on Desktop vs Smartphone vs Tablet, US only, by age* [2]

# Our Further Analysis: Limitations of Study

Chinese University students care more about freight and less on security [3]

- University students are price sensitive.
- Freight may be an influential attribute in online purchasing.

Possession of non-shopping and shopping app

- Mobile users browsing a greater number of non-shopping apps possess a greater number of shopping apps. [4]
- Exposure of variety of apps lead to higher interest level in shopping app installation.

# Our Further Analysis: Other Areas to Explore

## Demographics Comparison

To conduct further analysis in the attributes definition based on age, income, education level, product types etc.

## Price Sensitivity

To investigate if price sensitivity is perceived more important than security for university students.

## Conservative vs Liberal Society

To compare how the attributes may differ in these societies.

# Our Further Analysis: Other Areas to Explore

## Secured Payment Platform

To determine how secured payment methods may affect electronic shopping behaviours e.g. Paypal, Android Pay, Apply Pay, AliPay, PayLah! etc.

## Electronic Shopping Obstacles

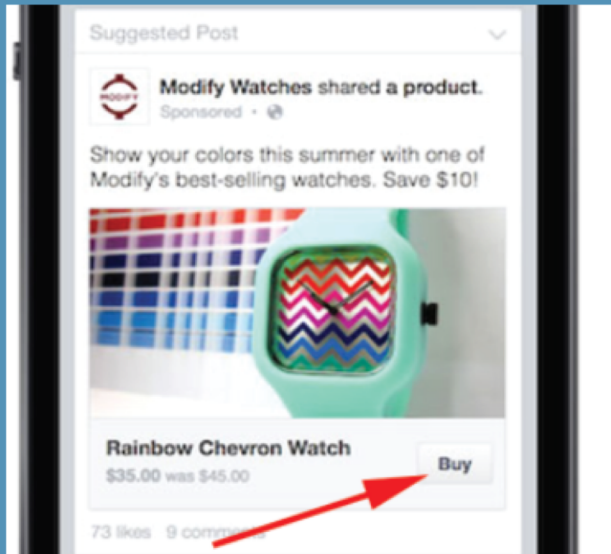

To determine negative user experience in mobile applications usage e.g. amount of memory space used, too many notifications, battery drain, high data usage etc.

# What's new in the current market?

All-in-one application

“Buy” & “Shop Now” buttons on popular social media platform

Facebook “Buy” Button Feature [5]

Instagram “Shop Now” Button Feature [6]

All-in-One App

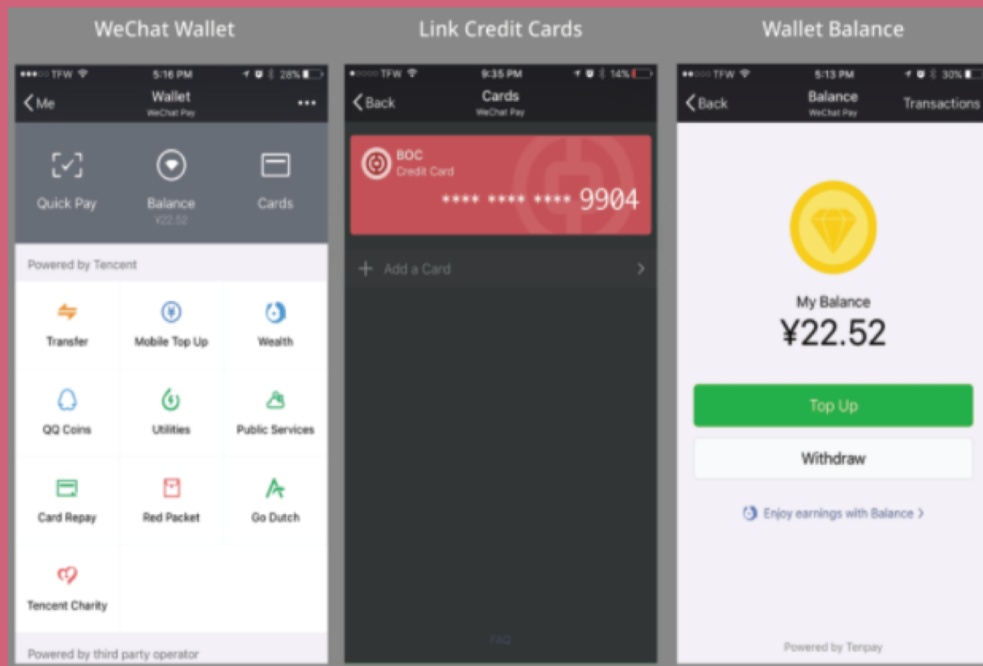

E-wallets

Brand Consolidators  
App

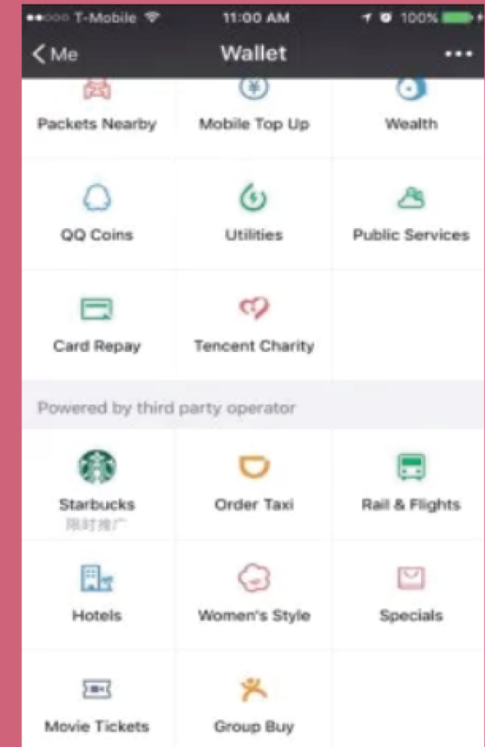

Marketplace App

# What's new in the current market?

## E-wallets

WeChat Wallet – Credit Card [7]

WeChat Wallet – Functions [8]

All-in-One App

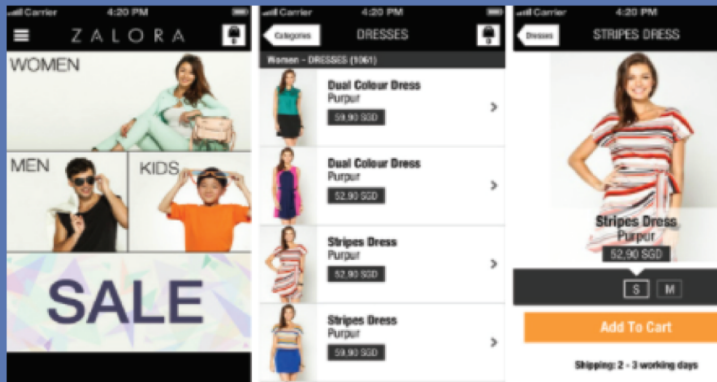

E-wallets

Brand Consolidators  
App

Marketplace App

# What's new in the current market?

## Rise in brand-consolidators applications

Zalora Marketplace [9]

Taobao Marketplace [10]

Mobile Exclusive Discount Codes [11]

All-in-One App

E-wallets

Brand Consolidators  
App

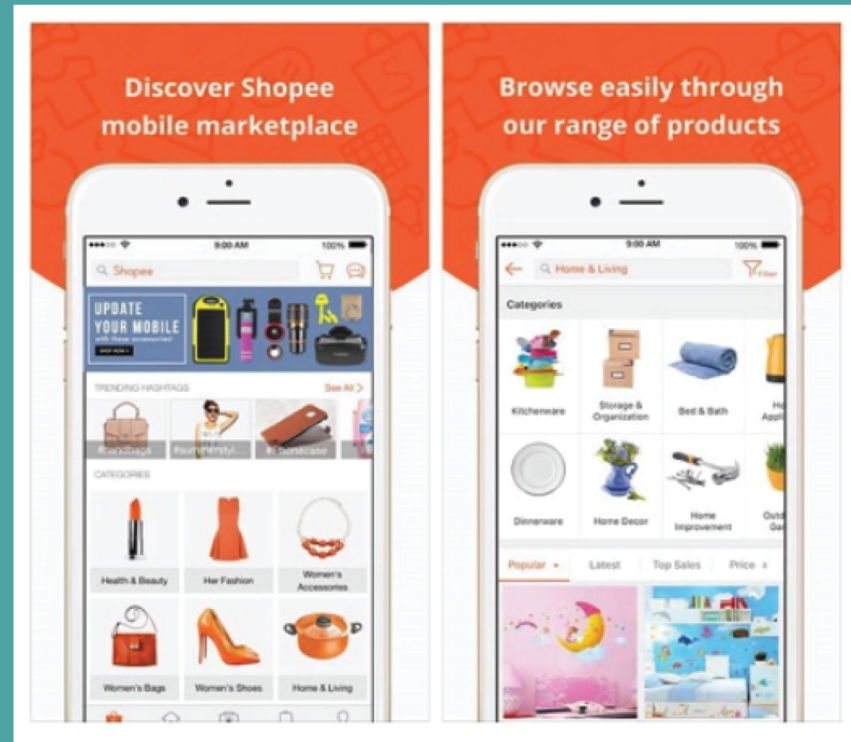

Marketplace App

# What's new in the current market?

## Rise in Consumer-Consumer marketplace applications

Carousell Marketplace [12]

Shopee Marketplace [13]

All-in-One App

E-wallets

Brand Consolidators  
App

Marketplace App

amazon

PrimeNow  
SKIP THE 3HR. ONE HOUR DELIVERY.

Launch in US on 2014 [14]

Launch in Singapore on 28th July 2017 [15]

Cheaper price

With 25,000+ items across 25 categories [16]

In Singapore offer 10AM-10PM daily delivery

Free 2-hour delivery with order > \$40

\$5.99 with order < \$40

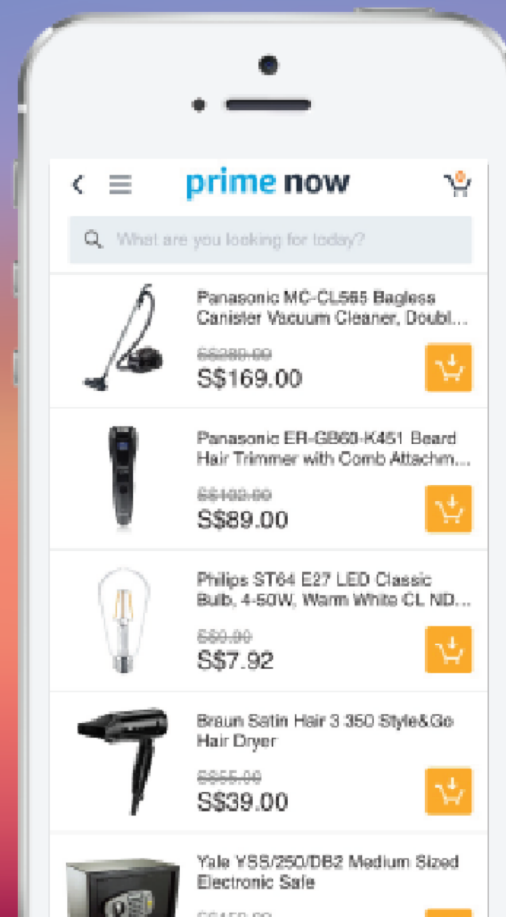

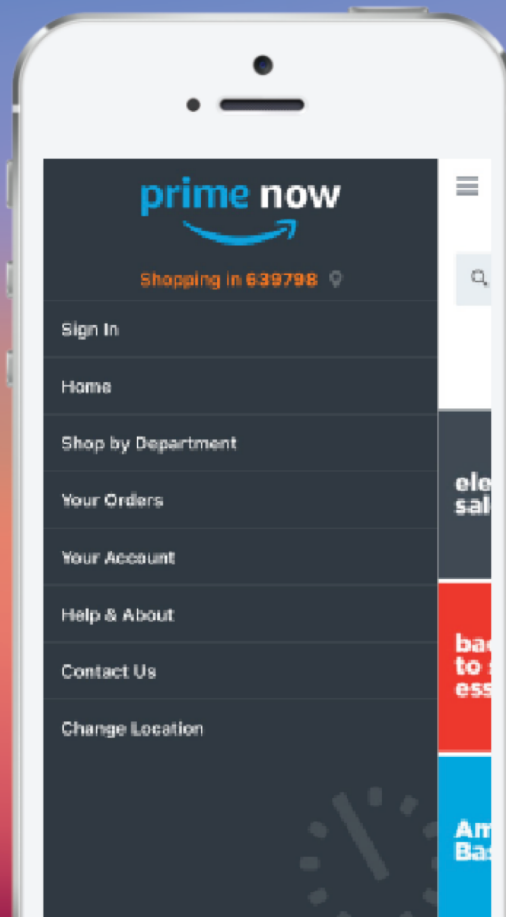

\$9.99 for 1-hour delivery [17]

amazon

PrimeNow  
SKIP THE TRIP. ONE HOUR DELIVERY.

amazon

Primenow  
SKIP THE TRIP. ONE-HOUR DELIVERY.

Delivery is unavailable on the second day after launch due to over-subscription [15]

Delivery using taxis and private hires [18]

Usage of promotional code, points

Amazon Dash

Smart devices to automatically order groceries and supplies [19]  
(not in Singapore yet)

## FUTURE TRENDS

Unified electronic payment platform

Usability and acceptance by older generations in mobile applications shopping

Artificial intelligence mobile app

Augmented reality in mobile shopping experience
